## NEWS FOR CHOCOLATE LOVERS

We all know that eating too much chocolate can be bad for our health. But now there's a new problem with chocolate. Soon there won't be enough of it for chocolate lovers to enjoy.

There are two reasons for this problem. The first reason is recent changes in the weather. Today the weather is very hot and dry in many countries. This makes it hard to grow cocoa beans\*. Chocolate companies use these beans to make the chocolate we eat. A second reason for this problem is that people are eating more chocolate today, especially in China and India.

Farmers are now growing a new kind of cocoa bean. They believe that this bean can grow well in hot, dry weather. However, chocolate from this new bean isn't as tasty as the chocolate we eat today. Chocolate companies will have to add things like nuts and fruit to the chocolate to make it taste better. But this will make the chocolate more expensive.

Some scientists think the situation is not so bad. They say there are still enough cocoa beans to make the chocolate we like. So, the world's chocolate lovers don't need to panic yet.
